Dileep Atyam

Work Experience

Internshala | Gurgaon, Haryana

Sotware Development Engineer   Jul 2021 - Present

- Collaborated with cross-functional teams to design & develop full-stack product using Javascript, JQuery, React, MySQL, PHP and Node.
- Integrated React library using webpack configuration, leading to enhanced performance and maintainability by seamlessly migrating multiple pages to React.
- Handled payment gateways like Ccavenue, Stripe and developed tools for invoice generation.
- Conducted code reviews for junior developers and provided technical support to the business team.
- Created automated crons and crawlers to streamline task automation and facilitate data migration.

Software Development Engineering Intern   Jan 2021 - Jul 2021

- Created various campaign pages from scratch with the aim of attracting new users to the platform.
- Implemented essential ATS features, including an Assignment tool, Applicant search, and application filters.
- Engineered admin tools for streamlined user management, including user auto-blocking and chat tracker.
- Ensured application stability through code cleaning and bug fixing.

Education

Bachelors in Computer Science   Jun 2017 - May 2021

Vel Tech Institute of Science & Technology | Chennai, Tamil Nadu

CGPA: 8.5

Recent Projects

Resume Builder   Source code   Demo

A React application that offers users an unparalleled experience to craft their own personalized resumes. This resume is created using the tool.

Shopper   Source code   Demo

An e-commerce application developed with React, TypeScript, and Redux Toolkit, providing users with a platform to shop for a wide range of products.

Accomplishments

During college, created automated tools for Time Table Management, Mentor Management, and Grade Card Generation, enhancing operational efficiency for students and faculty.
